Zaki Haider

AI/ML & CV Intern @KDD | ML Systems · GenAI Pipelines ·
Computer Vision | Final Year @FAST-NUCES
Islāmābād, Pakistan

Summary

I'm a final-year Software Engineering student at FAST-NUCES, internee at Knowledge Discovery and Data Science (KDD) where I work on AI/ML and Computer Vision systems. My focus is on building end-to-end ML pipelines, from data preprocessing and model training to deployment-ready GenAI workflows. I work across Python, PyTorch, TensorFlow, and Scikit-learn, and care deeply about understanding systems rather than just using tools. I'm actively looking for AI/ML or software engineering roles where I can contribute to real-world products. Open to full-time positions starting mid-2027 and internships immediately.

Experience

National University of Computer and Emerging Sciences
8 months

Teaching Assistant - Multi Variable Calculus
August 2025 - January 2026 (6 months)

- Supported 50+ students in Multivariable Calculus through assignment grading, and concept review sessions.
- Prepared and delivered supplementary problem sets to reinforce lecture material, contributing to improved class performance.
- Served as primary point of contact for student queries, resolving doubts on topics including partial derivatives, gradients, and vector fields.

Teacher Assistant - Calculus
June 2025 - August 2025 (3 months)

- Assisted course instructor in grading assessments and quizzes for a class of 50+ students each semester.
- Held weekly help sessions to support students with challenging topics including limits, integration techniques, and series.
- Recognized for consistent and clear communication of abstract mathematical concepts to engineering students.

Knowledge Discovery and Data Science

AI/ML/CV

June 2025 - August 2025 (3 months)

Islāmābād, Pakistan

- Developed and fine-tuned computer vision models using PyTorch for text-to-image generation model, achieving 91% accuracy on the test set.
- Built end-to-end data pipelines for preprocessing and augmenting images datasets used in ML training workflows.
- Collaborated with senior researchers to implement and evaluate ML model for image generation using NLP.
