PROFESSIONAL SUMMARY

Final-year Software Engineering student at FAST-NUCES (completing 6th Semester) with practical experience in full-stack web development using the MERN stack, REST APIs, and WebSocket-based real-time systems. Proven ability to deliver production-grade modules in large team projects, and a track record of building complete web applications end-to-end. Actively seeking web development internships and roles where I can contribute to scalable, user-facing products.

WORK EXPERIENCE

National Freelance Platform — Collaboration Module

2024 – 2025

Full-Stack Developer — Module Lead (Team Project)

- Led development of Module 5 (Collaboration & Team Workspace) as part of an 11-module national-scale freelance platform built by a cross-functional team.
- Built the full frontend workspace in **React.js** / **Next.js** — including a Kanban/List task board, team management panel, file repository UI, real-time chat panel, meeting hub, and activity log viewer.
- Developed backend services in **Node.js** / **Express**: RBAC engine, task management service, WebSocket chat server (Socket.IO), file storage integration, and activity logger API.
- Integrated with external modules including Authentication, Notifications, File Storage, and **Google Meet / Zoom APIs** for meeting link generation.
- Followed a full SDLC: SRS review, system architecture design, database schema design, REST API design, unit/integration/performance/security testing, CI/CD pipeline setup, and production deployment.

openHPI — Hasso Plattner Institute

May 2025

Practical Computer Vision with PyTorch — Trainee

- Completed structured deep learning coursework with hands-on implementation of CNNs and Vision Transformers using PyTorch — demonstrating ability to integrate AI features into software products.

EDUCATION

FAST-NUCES, Islamabad, Pakistan

Aug 2023 – Jun 2027 (Expected)

Bachelor of Software Engineering | CGPA: 3.1+

Relevant Coursework: Web Engineering, Database Management Systems, Software Quality Assurance, Operating Systems, AI & Machine Learning, Data Mining.

PROJECTS

National Freelance Platform — Collaboration & Team Workspace — *React.js, Next.js, Node.js, Express, Socket.IO, MongoDB*

- Designed and implemented a complete team collaboration workspace within a large-scale freelance platform, handling real-time chat, task tracking, file sharing, and meeting scheduling.
- Architected a Role-Based Access Control (RBAC) engine and WebSocket chat server supporting concurrent team communication via Socket.IO.
- Delivered across all phases: requirements, design, frontend, backend, integration, QA, and production deployment with CI/CD.

E-Commerce Clothing Store — Full-Stack Web App — *MongoDB, Express, React.js, Node.js (MERN)*

- Built a complete full-stack e-commerce web application for a clothing store (similar to Outfitters) as a capstone MERN stack project.
- Implemented product catalogue, shopping cart, user authentication, and order management with a responsive React

frontend and REST API backend.

- Designed and managed a MongoDB database schema for products, users, and orders.

SmartMail — Intelligent Email Insights Platform — *MERN Stack, NLP, Data Extraction, Dashboard*

- Built an email intelligence web application that ingests a user's inbox, extracts structured data from emails, and surfaces key insights — urgency ratings, deadlines, action items, and sender analytics — in a clean dashboard.
- Developed an automated priority-scoring engine to classify emails by deadline proximity and importance, enabling users to focus on what matters.
- Won **1st place at SOFTEC** (national 24-hour hackathon, FAST University Lahore) with this project, competing against top teams from across Pakistan.

Career Connect — Job Fair Management System — *SQL Server, Desktop Application, REST API*

- Designed a 3NF-normalized SQL Server database and multi-role desktop application featuring real-time check-ins and an admin dashboard for placement and interview analytics.

ACHIEVEMENTS

- **1st Position — App Development, SOFTEC (FAST University Lahore):** Won first place at a prestigious national-level 24-hour hackathon with SmartMail, an intelligent email insights platform, competing against top university teams from across Pakistan.
- **Winner — University-Wide AI Hackathon, SES Society:** Outperformed multi-university teams by developing a functional full-stack AI solution within a limited timeframe.
- **4× Teaching Assistant — FAST-NUCES Islamabad:** Selected for four consecutive terms to mentor junior students in programming logic, debugging, and software engineering principles.
- **Volunteer — Indus AI Week, Ministry of IT Pakistan:** Contributed as a technical volunteer at the national AI awareness event organised by the Ministry of IT, February 2026.

TECHNICAL SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), Responsive Design

Backend: Node.js, Express.js, REST API Design, WebSocket / Socket.IO, Django

Databases: MongoDB, MySQL, SQLite, PostgreSQL, NocoDB

Full-Stack: MERN Stack, Authentication (JWT), RBAC, CI/CD Pipelines, Google Meet / Zoom API Integration

Automation & Tools: n8n (workflow automation), Slack integrations, Git/GitHub, VS Code, Postman, Cypress

Programming Languages: JavaScript, Python, C++, Java, SQL

AI Integration: LangChain, Streamlit, Flask — ability to embed AI/ML features into web products

CERTIFICATIONS

- **Fundamentals of Machine Learning and Artificial Intelligence** | AWS Training & Certifications | Jun 2025
- **Practical Computer Vision with PyTorch** | Hasso Plattner Institute (openHPI) | May 2025
- **Process Mining: Data Science in Action** | Coursera — Eindhoven University of Technology | 2025
- **1st Place — App Development Hackathon Certificate** | SOFTEC, FAST University Lahore | 2025

LANGUAGES

Urdu: Native **English:** Intermediate Proficiency
